FOREWORD

When ordering a spare part, specify the part number, part name, and quantity required, and also specify your machine model code, machine serial number, engine serial number and the service meter reading.

This Parts Book describes not only standard items but also optional equipment and attachments. To order a part, please contact your nearest Komatsu distributor.

This Parts Book contains the information and special symbols as follows:

Figure and list	When you open this Parts Book, you will find an illustration on the left page (even-numbered page) for the spare parts group. Each individual part in the group is given an index number. On the right page, the component parts of the group are listed in the order of the index numbers shown on the illustration page. The part number, part name, and applicable machine serial number are given for each part.
FIG. No.	The FIG. No. is the number of the illustration shown on the page. It is not the spare part number. The numbers are not always continuous.
INDEX	This is the same as the index number in the illustration. The parts are listed in index number order.
PART No.	The number given in the PART No. column is the part number for the part shown. It is the code used when ordering that part. It is important that there be no mistake in this code number when ordering.
DESCRIP-TION	This gives the name of part that has the part number listed. The mark "." is put in front of the part name of an assembly part and the item is entered following the assembly. If a part marked with "." is a sub assembly, its components are marked with "..". Example: ELEMENT ASSEMBLY, AIR CLEANER .ELEMENT ASSEMBLY, OUTER ..ELEMENT, OUTER ..NUT, WING ..WASHER
Q'TY (Quantity)	This specifies the number of pieces used for one machine. However, if a part is included in the assembly and/or component, the quantity per such assembly and/or component is specified.
SERIAL No.	Applicable engine serial number is indicated for the engine volume. In the chassis volume, this indicates the machine serial number in which the part is used.
Symbols and codes	Symbols and codes are used in the PART No. and DESCRIPTION columns, and represent the following: ☐ The part specified in the line above can be used instead of this part.

Symbols and codes (Cont'd)
